EDUCATION

PhD in Mathematics — Oct 2020 - ongoing
Polish Academy of Sciences, Warsaw, PL

Master's Degree in Data Science (graduated cum laude) — Oct 2018 - Sep 2020
Università degli Studi di Padova, Padova, IT

Bachelor's Degree in Physics — Oct 2013 - Apr 2017
Università degli Studi di Padova, Padova, IT

PUBLICATIONS

[1] P. Dłotko and D. Gurnari, "Euler Characteristic Curves and Profiles: a stable shape invariant for big data problems", *GigaScience*, Oct. 9, 2023, DOI: 10.1093/gigascience/giad094

SELECTED TALKS AND POSTERS

"Euler Characteristic Profiles" - 51st Conference on Applications of Mathematics, Kościelisko, Sep. 12 2023;

"Exploring relations between knots invariants using Mapper algorithms" - Winter Braids XII, Tours, Feb. 22 2023;

"Extensions of Mapper–type algorithms and their applications to knot theory" Poster - Young Topologists Meeting, Copenhagen, Jul. 19 2022;

"Euler Characteristic Curves (and Profiles)" - Applied Topology in Będlewo 2022, Będlewo, Jul. 04 2022;

"Distributed algorithms for Euler Characteristic Curves (and Profiles)" - Machine Learning 4 Society seminar, Oxford, online, Jan. 26 2022;

"Good data and where to find them: the challenges in modelling the pandemic" - 60th ERSA Congress, online, Aug. 25 2021;

"Euler Characteristic Curves" - Second Symposium on Machine Learning and Dynamical Systems, Fields Institute, online, Sep. 21 2020.

AWARDS

Young Mathematicians Award for the best paper presented at the 51st Conference on Applications of Mathematics, Koscielisko, Sep. 10-16 2023

NC State Research Image Contest 2023, First place in the graphics and data visualization category

RELEVANT EXPERIENCES

PhD candidate — IM PAN - University of Warsaw
October 2020 - ongoing — Warsaw, PL
I am a PhD student in the Dioscuri Centre in Topological Data Analysis. My research is focused on developing new and efficient shape descriptors, with a strong interest in practical real-world applications.

Research intern — IBM Research
May 2023 - August 2023 — Yorktown Heights, New York, USA
I worked with members of Dr. Laxmi Parida's computational genomics team and Prof. Saugata Basu on harmonic persistent homology and its applications, particularly in Health Care & Life Sciences problems. This project lead to the submission of two invention disclosures and a research paper is currently under review.

Collaboration — University of Oxford
April 2020 - January 2021 — Oxford, England, UK
I contributed to the OxCOVID19 project. I helped design and implement a large, multimodal relational database consisting of information related to the COVID-19 pandemic.

Erasmus+ traineeship — Swansea University
March 2020 - June 2020 — Swansea, Wales, UK
I worked with Dr Paweł Dłotko on large scale computations of Euler Characteristic Curves of high dimensional datasets. This work resulted in my Master's thesis and it is currently being extended in my PhD research.

Collaboration — Fondazione Bruno Kessler
July - August 2019 — Trento, Italy
I worked with Professor Luciano Serafini in the development of an algorithm for incremental learning of discrete planning domains.

TEACHING

Invitation to Topological Data Analysis — Summer term 2022
Group instructor — University of Warsaw, PL

Linear Algebra — Winter term 2021-22
Group instructor — University of Warsaw, PL

Mathematical Analysis 2 — Summer term 2021
Group instructor — University of Warsaw, PL

RESEARCH SOFTWARE

maTilDA — https://github.com/IBM/matilda
Multipurpose toolkit for TDA. I developed the `harmonic` module.

PyBallMapper — github.com/dgurnari/pyBallMapper
Python implementation of the BallMapper algorithm.

pyEulerCurves — github.com/dgurnari/pyEulerCurves
Python package for parallel computations of Euler Characteristic Curves.

TECHNICAL SKILLS

Python: good knowledge, in particular *NumPy*, *Pandas*, *Scikit-learn*, *PyTorch* and *pySpark*;
R: discrete knowledge;

C++: discrete knowledge;
LaTeX: good knowledge.

LANGUAGE SKILLS

Italian: Native
English: Proficient
Polish: Beginner
German: Beginner
